Uitleg

Hoe werkt het?

De kinderen kiezen zelf bij welk level zij willen beginnen. Ze schatten dus zelf in op welk niveau zij werken.

De kinderen maken een rijtje met sommen en controleren vervolgens hun antwoorden. Alles goed? Dan mag je naar het volgende level. 1 of meer fout? Dan probeer je een ander rijtje van hetzelfde level.

3 rijtjes geprobeerd, maar niet foutloos gelukt? Dan kunnen ze eventueel een level terug. Dit level kunnen ze vervolgens uitspelen: alle rijtjes van dit level foutloos maken. Ook als kinderen bij het laatste level zijn gekomen, kunnen zij deze uitspelen.
